The Dawn of a New Era for Mangakino

Following on from the community consultation in August on the future shape of schooling in Mangakino, the following announcement was released this week:

The Minister of Education, Chris Hipkins, has made the decision to change the status of Mangakino Area School to a **Years 1 to 8 Full Primary School**. The change of status is due to take effect on 28th January 2019.

The school has now been provided with the Executive Summary of the community consultation report regarding the status of the school, and we have published this report on our Facebook page if you wish to read the summary.

There are several implications regarding this decision. The school is working closely with secondary schools in Tokoroa to begin a transition plan for Year 8 students in readiness for 2019. This will include enrolment information for parents. The Ministry of Education will also be contacting parents of Year 8 students around transport arrangements for 2019 so that students can access their secondary education in Tokoroa.

We are now starting the appointment process for a new principal to lead the full primary school. A Principal Appointment Committee has been set up to assist me in this process and we will have an advertisement in the Education Gazette very soon.

The decision by Minister Hipkins signals a new era for education in Mangakino. It will be an exciting opportunity for a new leader to work with the community and staff to create authentic and localised learning programmes for your children.

Wayne Gribble
Commissioner

Public Notices

TAUPŌ DISTRICT WATER SUPPLIES

NOTICE TO ALL CONSUMERS

The Ministry of Health has identified that some plumbing fittings have the potential to allow minute traces of metals to accumulate in water standing for several hours.

Although the health risk is small, the Ministry of Health recommends all households flush and discard at least one mugful of tap water each morning [run tap for about 10 seconds] before use to remove any metals that have dissolved from plumbing fittings.

The Ministry of Health recommends this simple precaution for all households, including those on public and private water supplies.
