TAUPŌ DISTRICT WATER SUPPLIES

NOTICE TO ALL CONSUMERS

The Ministry of Health has identified that some plumbing fittings have the potential to allow minute traces of metals to accumulate in water standing for several hours.

Although the health risk is small, the Ministry of Health recommends all households flush and discard at least one mugful of tap water each morning [run tap for about 10 seconds] before use to remove any metals that have dissolved from plumbing fittings.

The Ministry of Health recommends this simple precaution for all households, including those on public and private water supplies.
